Electrode for solar power generation device, is in the form of specific pattern such as character, symbol or graphic and is arranged on light receiving surface of solar cell

HONDA MOTOR CO LTD 2000.08.17 2000JP-287744

(2002.02.28) H01L 31/04

Novelty: The electrode (2) is arranged on the light receiving surface of a solar cell (1). The electrode is in the form of specified pattern such as character, symbol or graphic.

Detailed Description: An INDEPENDENT CLAIM is also included for manufacturing method of electrode.

Use: For solar battery of solar power generation device.

Advantage: The cell is identified by visual observation without reduction of electricity generation efficiency.

Description of Drawing(s): The figure shows the electrode in different patterns.

Solar cell 1

Electrode 2
